Why choose the Lamador® – Impuls® Super package from Bayer?

What are the benefits and technical advantages of the Lamador® + Impuls® Super package

- Maximum protection of the crop against diseases in the autumn;
- Broad spectrum of controlled diseases transmitted by seeds, soil and spores;
- Physiological effect on the cultivated crop, expressed in healthy, well-tillered plants with a strongly developed root system and resistance to winterkill;
- Flexibility in the application of Impuls® Super;
- The plant treated with Lamador® is protected against covered and loose smut, snow mold and Fusarium root rot;

- The plant treated foliarly with Impuls® Super is protected against eyespot, rusts, powdery mildew and others.

Economic advantages of the Lamador® + Impuls® Super package

- You receive the package offer at a better price than if you purchase the two products separately;
- When purchasing 5 Lamador® + Impuls® Super packages, you receive a 5 L bonus of Impuls® Super

What are the advantages of Lamador®?

- Lamador® is a proven seed treatment product with excellent control of seed- and soil-borne diseases;
- It protects plants from smuts, Fusarium root rot, snow mold, leaf stripe, net blotch, etc.
- It increases tolerance to drought due to a more powerful root system;
- Improved plant habitus – broader leaves and larger stem diameter;
- Increased resistance to lodging and winterkill – shortened mesocotyl;
- Uniform emergence, well-tillered stand and healthy plants.

Why rely on Impuls® Super?

- Impuls® Super has a characteristic eradicated action against the causative agents of rusts, eyespot, powdery mildew and others.
- The product is used as needed and can be combined with other plant protection products;
- It is applied in a timely manner and, in the absence of diseases, its application can be postponed;
- It has preventive, curative and eradicated action;
- You achieve economic efficiency and return on investment.
