

Очаквайте през 2021 година на българския пазар Тренд® 90 с ново търговско име Виволт™ 90, като нова търговска марка на Corteva Agriscience™

Author(s): Растителна защита
Date: 03.03.2021 *Issue:* 3/2021

Dear farmers, the Corteva team would like to inform you that from 2021 onwards, the sticker Trend® 90 will be offered on the Bulgarian market under a new trade name – Vivolt™ 90, which is a registered trademark of Corteva Agriscience™. The packaging of Vivolt™ 90 will be 1 L - white, with a blue cap and branded with the Corteva Agriscience™ logo.

In this regard, we would like to take the opportunity to inform you that from 2021, as well as in the future, Corteva Agriscience™ products will have a new appearance – white packaging with a blue cap and branded with the company logo.

Vivolt™ 90 improves the adhesion of herbicides and their absorption into plant tissues. In this way, the efficacy of the herbicide is increased and its action is enhanced. This is particularly important during periods of slow growth (due to drought or cold weather), as well as for weeds whose leaves are difficult to wet – whether due to a waxy coating or hairs. Low temperatures do not affect the efficacy of the product.

In 2021 Corteva will offer Trend® 90 until stocks are exhausted, after which the Vivolt™ 90 trademark will be offered, both as a stand-alone product and in packages with herbicides.
