

Advantages of Express®Sun™ Technology in Sunflower Cultivation

Author(s): Растителна защита
Date: 16.03.2021 Issue: 3/2021

ExpressSun® technology was discovered and introduced into practice by *DuPont* and *Pioneer*, the companies whose agricultural businesses are today united in the company **Corteva Agriscience™**.

The original **ExpressSun®** technology belongs to *Corteva*. The technology is well known to all producers. We at *Corteva* can always add more new and interesting facts about it.

ExpressSun® technology is a registered trademark of **Corteva Agriscience™** and was introduced to the market for the first time in 2005. Since then, the company has allocated substantial investments to the development of new hybrids based on this technology, which build upon the qualities of the previous ones and deliver ever greater benefits for farmers.

The technology is an exceptional prospect for increasing yields in sunflower production.

Through innovative approaches and investments in the development of increasingly high-yielding hybrids under the *Pioneer®* brand, *Corteva*, as the undisputed leader in this segment, is working to

build a secure future for agricultural producers.
