

What you will read in issue 7/2021 of the magazine "Plant Protection"

Author(s): Растителна защита
Date: 06.08.2021 Issue: 8/2021

The August issue of the magazine "Plant Protection" for 2021 has been published.

In the **theme** of the issue we present the Institute of Rose, Essential Oil and Medicinal Crops in Kazanlak. The idea to establish such an institution dates back to 1906. Despite the difficulties and numerous reorganizations, over the years the Institute has managed to grow from an experimental field into a leading scientific unit in essential oil production. In the issue you can follow the long and dynamic history of one of the most fragrant institutes in the system of the Agricultural Academy.

Breeding, varieties and plant protection in oil-bearing rose

Introduction of aromatic medicinal plants

How to preserve the quality of Bulgarian rose oil

Application of essential oils in perfumery products
