

Secure protection against soil pests

Author(s): Суммит Агро

Date: 18.02.2023 *Issue:* 2/2023

Reliable protection against soil pests such as wireworms, cutworms (noctuids), Diabrotica and others with the microgranulated insecticides **Ercole** and **Trika Expert**!

 Ercole contains the most powerful soil insecticide, and in Trika Expert it is additionally enhanced with nitrogen and phosphorus for a faster start and a well-developed crop stand.

 The microgranules are in a special formulation that preserves the active substance and ensures longer-lasting action and protection.

 The products are applied locally during sowing or inter-row cultivation of the crops (maize, sunflower, potatoes, etc.).

In relation to their application, Summit Agro also offers on the Bulgarian market applicators suitable for all types of seeders.
