Part of the fungicides offered by Summit Agro for the 2023 season!

 PATEL – 300 g/l prothioconazole, a proven systemic triazole with preventive, curative and eradicated action, extremely effective for the control of fusarium in cereal crops.

 BOUNTY – 430 g/l tebuconazole, the most budget-friendly liquid tebuconazole. High concentration that facilitates the handling of the product. Effective against the main diseases in cereal crops such as powdery mildew, rusts, septoria and fusarium.

\*Also registered in oilseed rape against a number of diseases + growth regulator effect.

 UASAN – 300 g/l bromuconazole – a new addition to the portfolio of Summit Agro, the only product on the market containing pure bromuconazole.

 CONCLUDE AZT – 250 g/l azoxystrobin – a fungicide with preventive and curative action from the strobilurin group, with a strongly pronounced greening effect.
