

Development without stress

Author(s): Суммит Агро

Date: 29.03.2023 Issue: 3/2023

The advertisement features a central image of a stack of smooth, grey stones balanced on a larger, mossy rock. Two water fountains spray water upwards from behind the stones. The background is a soft-focus green landscape. The text is overlaid on the image and a green sidebar on the right.

High-class biostimulants and foliar fertilizers from Summit Agro!

 KAISHI MAX® – highest concentration and cost-effective – containing 80% free amino acids of plant origin, used for resumption of vegetation, stimulation of vegetative growth and recovery of plants after stress situations.

 Approved for organic farming.

 SHIGEKI® – biostimulant based on seaweed extract from *Ascophyllum nodosum* + nitrogen, phosphorus and potassium, as well as microelements in chelated form (EDTA). SHIGEKI activates the natural defence mechanisms of plants – increases immunity and also tolerance to abiotic stress.

 Approved for organic farming.

 FERTIGOFOL ULTRA – Complex NPK foliar fertilizer with microelements and amino acids, suitable for a number of crops, providing plants with the most important nutrients in an appropriate ratio for 100% uptake.

 Terra-Sorb Complex – the well-known and time-proven liquid biostimulant containing 20% free amino acids + macro- and microelements.
