Protect your maize crops from weeds!

Take advantage of a comprehensive herbicide solution for complete control of grass and broadleaf weeds with Principal™ Plus.

Principal™ Plus controls all economically important weeds, including those that are difficult to control, with a single treatment. - There is no need to mix it with another herbicide to broaden the spectrum of action.

Suitable for technology without the application of a soil-applied herbicide.

With a wide application window and flexibility from the 2nd to the 6th leaf stage of maize.

Apply Principal™ Plus from the 2nd to the 6th leaf stage of maize at a rate of 44 g/da + Vivolt™ adjuvant 0.1% solution. A single treatment is sufficient for complete control throughout the entire vegetation period!
