Reliable protection for your seeds with the products of Summit Agro!

 Difend Extra – a broad-spectrum, double-systemic fungicide for treatment of cereal seeds, containing difenoconazole and fludioxonil. Two active substances that complement each other and provide complete protection against all economically important seed- and soil-borne diseases.

 Difend FS – well-known to all agricultural producers and proven over the years seed treatment product, containing pure difenoconazole, for the control of seed-borne diseases in cereal crops.
