

Univoc®: "The Alien" fungicide

Author(s): Corteva Agriscience™

Date: 08.05.2024 Issue: 5/2024

🌟 Univoc is not just a fungicide! It's a promise of agricultural excellence!

Discover the countless advantages that make Univoc® the preferred choice for cereal crop protection, powered by its dynamic duo of active ingredients.

1. Thanks to the unique mode of action of the new active ingredient, Univoc® not only fights diseases but also acts as a preventive protection for your crops.
2. Univoc's flexibility shines with a wide application window, ensuring comprehensive coverage for all crop growth stages during T1, T2, and T3.
3. Univoc does not linger where it is not needed. Its rapid degradation in the soil minimizes environmental impact, offering an eco-friendly solution without compromising efficacy.

4. Univoc strikes a delicate balance, providing a beneficial biological effect on crops while maintaining a toxicological profile that is positively oriented towards the environment and other non-target organisms.

 **Have you ever wondered about the production behind Univoc®?**

It all begins with the reproduction of *Streptomyces* spp. bacteria, proceeds through a meticulous fermentation process, and transforms into a ready-to-use product protecting your crops.

 Grow with confidence, knowing you have a partner who prioritizes efficacy, sustainability, and the well-being of your crops and the environment.
