Date: 04.06.2024 *Issue:* 6/2024

With attention and care, we from **Fito Terra EOOD** will offer you the best – solutions! Solutions based on experience and pure agriculture. On the Bulgarian market, we offer the products of Atlantica Agricola, which for more than 40 years have been successfully developing and selling their fertilizers, enriching the soil and acting at every stage of plant development.

Florone is a universal biostimulant, obtained from hydrolysis of plant proteins. It also contains NPK. It causes stimulation of early flowering, thereby producing a larger number of flower buds and improving the acceleration

of plant growth, as well as stem thickening. It has a positive effect on the strength of the leaves and the root system of plants. It ensures mo-re rapid ripening of fruits. It stimulates the physiological development of crops and is recommended for application under abiotic and biotic stress.

Recommendations for use:

Both foliar and drip application are recommended.

Product composition:

Free amino acids4 % w/w concentration

Total nitrogen (N) 1 % w/w concentration

Phosphorus pentoxide (P₂O₅)10 % w/w concentration

water-soluble

Potassium oxide (K₂O)10 % w/w concentration

water-soluble

Boron (B) water-soluble0.25 % w/w concentration

Molybdenum (Mo), water-soluble0.20 % w/w concentration

Treated plants: vegetables (tomatoes, cucumbers, peppers, eggplants, pumpkins, beans, melons), fruit trees and flowers

ДОЗИ

Култура	Листно сс/100 L	Чрез напояване * L/ha	Наблюдения
Овощни дървета	50-75	2-4	Да се прилага по време на вегетативен растеж. Също така преди и след цъфтежа за насърчаване на завърза.
Градинарски култури	50-75	2	
Хидропонно отглеждане	50-75	2	
Полски култури	0.2-0.6 L/ha	-	-

* Проценти за приложение.

IMPORTANT: These doses are indicative and it is up to the user to reduce or increase them depending on the extent of the plants and their physiological condition.

COMPATIBILITIES:

- Can be mixed with common NPK fertilizers and most phytosanitary products, with the exception of copper liquids and sulfur.
- Do not mix with calcium-sulfur liquids, nor with products with a very acidic or very alkaline reaction.
