

Crops, varieties and seed categories offered by IRGR Sadovo

Author(s): Растителна защита
Date: 27.08.2024 *Issue:* 8/2024

In connection with the upcoming autumn campaign in 2024, IPGR-Sadovo provides a list of the varieties created there by crops and seed categories, which will be offered for sowing.

Seeds from Sadovo are of interest to all those engaged in seed production for trade or for their own needs, as well as to those who are already convinced that sowing with high-quality seeds of suitable varieties is one of the most important prerequisites for achieving high results.

The Institute in Sadovo is not only the patented owner of these varieties, which are widely distributed throughout the country, but also a licensed seed producer registered with IASAS and included in the lists of the State Fund

“Agriculture” for the provision of seeds under all schemes, and it also provides an opportunity to participate in interventions to promote the use of crops and varieties resistant to climate change.

The prices determined by the Institute are as follows:

- For basic seeds of wheat, triticale and barley – BGN 1000/t excluding VAT;
- For basic seeds of rye and oats – BGN 1000/t excluding VAT;
- For wheat, triticale and barley C1 – BGN 750/t excluding VAT;
- For rye and oats C1 – BGN 800/t excluding VAT;
- For basic seeds of winter pea – BGN 3500/t excluding VAT;
- For winter pea C1 – BGN 3000/t excluding VAT.

It is advisable in August to first submit a request by e-mail or telephone for the preferred varieties, the category and the required quantities. If interested, you can also receive a consultation for the choice of a variety suitable for the respective region.

Everyone who purchases seeds from IPGR Sadovo will receive a brief recommended varietal technology for cultivation during 2024/2025.

**КУЛТУРИ, СОРТОВЕ И КАТЕГОРИИ СЕМЕНА
ПРЕДЛАГАНИ ПРЕЗ 2024 г. ОТ
ИРГР САДОВО**

№	КУЛТУРА	СОРТ	КРАТКА ХАРАКТЕРИСТИКА	КАТЕГОРИЯ СЕМЕНА
