syngenta.

Profitable and reliable protection against economically important diseases, suitable for the first treatment of cereal crops.

Amistar Prime is the most preferred fungicide for the first treatment in cereals for 2024!

The exceptional balance of excellent efficacy and good price has turned the product into the most preferred one by Bulgarian farmers.

The qualities of **Amistar Prime** are undoubtedly many, but perhaps the most important is the reliability of its decisive action and the long-lasting protection of cereal plants.

This season we have made efforts to maintain this balance so that you can obtain top-class crop protection at the best price.

ADVANTAGES OF AMISTAR PRIME:

- **Amistar Prime** can also be applied at low temperatures
- **Amistar Prime** – a top-class fungicide for reliable protection of cereal crops.

This season as well, you can obtain it on even more favourable terms in a package with a herbicide of your choice from Syngenta.

Amistar Prime – a unique combination with an excellent price-performance ratio!
