*Date:* 16.07.2025 *Issue:* 7/2025

Summit Agro and “Vitoshka-92” Ltd. – another year with a successful harvest of Papillon wheat in the village of Chepinci, Sofia region!

We are pleased again this year to share satisfactory results from the harvest of Papillon on the farm of “Vitoshka-92” Ltd.:

Average yield of over 850 kg/da with remarkable quality parameters – 14.6 protein, 34.5 gluten and 79 hectolitre weight.

 Papillon is a medium-early wheat, bread-making group A, characterized by strong tillering and high yield potential – the champion in our portfolio!

Saaten Union breeding, offered by Summit Agro in Bulgaria.

**A number of products from the Summit Agro portfolio are involved in the cultivation technology, some of which are:**

 SUMI ALFA / OAZIS / SUMICIDIN – a pyrethroid insecticide with the active substance ESFENVALERATE, distinguished by a rapid knock-down effect and strong repellent action!

 MOSPILAN 20 SP – the only ORIGINAL and LEGAL insecticide containing 200 g/kg acetamiprid – with systemic action!

 ! Japanese quality!

 SAZOLENE SC – a highly concentrated liquid nitrogen fertilizer based on urea–methylene urea – provides prolonged nutrition and release of NITROGEN (5 weeks) + UREA – fast nutrition. A KEY FACTOR for achieving HIGH QUALITY of production!

 ! NO RISK of leaf scorch (low biuret)

 NO LOSSES – does not leach and does not volatilize!

 ACTIFLOW CMZ – a balanced complex of Copper, Manganese and Zinc, specially designed for cereal crops.

 Innovative formulation – micronized particles!

*We thank "Vitoshka 92" Ltd. for their trust and wish them a trouble-free and successful harvest!*
