TONALE - a new soil herbicide for corn from Summit Agro

**100** TONALE contains THREE active substances with different modes of action, thanks to which it controls the main economically important grass and broadleaf weeds.

 TONALE is applied post-sowing pre-emergence or early post-emergence (up to the 3rd leaf stage of corn).

**!** **TONALE is a new, unique herbicide, with no direct equivalent on the market at the moment.**

**✓** innovative patented MICROPLUS formulation - a microencapsulated suspension that provides better efficacy and extended duration of action.
