

Today issue 3/2017 of the journal “Plant Protection” is being published

Author(s): Растителна защита
Date: 04.04.2017 Issue: 4/2017

On 5 April issue 3/2017 of the journal „Plant Protection” was printed. The topic of the issue is the key factors for sustainable cotton production. We have not forgotten the different cotton varieties suitable for regional cultivation in the country. A special guest of the issue is the cotton bollworm – an extremely dangerous pest of agricultural crops.

We are also launching a new column – **biocontrol**. In it you can learn how the natural control of pests and diseases is an alternative with a future.

See which topics will be relevant this month!
