

Issue 4/2017 of the journal "Plant Protection"

Author(s): Растителна защита
Date: 05.05.2017 *Issue:* 5/2017

See which topics are current in this issue.

Issue 4/2017 of the journal „Plant Protection” will be available from 8 May. The topic of the issue is pome fruit crops and their phytosanitary problems. You will learn more details about codling moths, aphids, psyllids and mites. The advice on how to identify the most common diseases and pests in field-grown cucurbit crops will also be useful for most farmers. We have not forgotten the monthly calendar for plant protection care in fruit crops, grapevine and vegetables, prepared with great attention and care by the experts from BFSA and the Maritsa Vegetable Crops Research Institute. We celebrate together with the company VIOLAE its anniversary in Sliven. Prof. Andon Vasilev presents microbial biostimulants for agricultural crops in our special supplement to the journal.

The topic

M. Borovinova – Pome fruit crops – phytosanitary problems

R. Andreev – Codling moths

I. Lecheva, N. Palagacheva – Aphids

A. Kharizanov – Psyllids

A. Stoeva – Mites

Biocontrol

V. Kharizanova – Biological control of wireworms and the grey corn weevil – an alternative to neonicotinoids

In support of practice

E. Loginova – How to identify the most common diseases and pests in field-grown cucurbit crops?

Traffic light

Plant protection care in May for:

T. Velichkova – Fruit crops and grapevine

S. Masheva et al. – Vegetables

Events

E. Ivanov – VIOLA AE: 25 years of upgrading our conceptual model

School for specialists

Prof. Andon Vasilev – Microbial biostimulants for agricultural crops
