

Success requires a firm hand... and a reliable helper – Axial!

Автор(и): syngenta, България
Дата: 15.02.2022 Брой: 2/2022

The banner features a close-up of a hand holding a wooden cricket bat, which is in the process of hitting a green cricket ball. The impact has just occurred, with a spray of green grass blades flying upwards from the point of contact. The background is a dark, moody sky with hints of orange and blue. The text is overlaid on the top half of the image. At the bottom, there are two logos: 'Аксиал' with a green circular icon to its left, and the 'syngenta' logo in white on a green rectangular background to its right.

Успехът иска здрава ръка...
и здрав помощник – **Аксиал**

 **Аксиал**[®] 

Axial: the most preferred product for controlling grass weeds by Bulgarian farmers for 2021!

Axial has been applied on more than 1.9 million decares in Bulgaria in wheat and barley, which makes it the number one product by treated area for 2021.

Over the years, **Axial** has proven its excellent efficacy against the most harmful grass weeds which, if not fully controlled, have the potential to significantly reduce yield per unit area.

Thanks to its high selectivity, **Axial** can be applied up to the flag leaf stage of the crop.

Axial gives farmers peace of mind in ensuring weed-free fields and setting the maximum yield potential per unit area.

These key advantages and the added value of the product for achieving higher yields and a sense of security make Axial the most preferred by farmers.

Axial - the choice is crucial!
