We present to your attention **Soleil** – the new fungicide of **Summit Agro**.

Soleil is a fungicide for cereal crops with preventive and curative action. The product contains a combination of the new active substance **BROMUCONAZOLE** and the well-known **TEBUCONAZOLE**. BROMUCONAZOLE is distinguished by longer-lasting disease protection and can be found exclusively in SOLEIL. In combination with tebuconazole, Soleil represents a high-quality and reliable shield, effectively protecting your crops from pathogens and ensuring the preservation of their high-yield potential!
