Issue 8-9/2017 of the journal "Plant Protection"

Автор(и): Растителна защита
Дата: 08.09.2017 *Брой:* 9/2017

See which topics are current in this issue.

On 7 September issue 8-9/2017 of the journal „Plant Protection“ was published. The topic of the issue is leaf-mining insects – destroyers of the plants' „laboratory“. In this issue we will introduce you to leaf-mining moths in fruit crops, the potato tuber moth in tobacco, as well as bark beetles and wood-boring insects in apple. In the Diseases section we will focus on non-infectious diseases in fruit crops. Integrated plant protection will also be covered with an interesting article by V. Kharizanova on the topic: „The role of sex pheromones in integrated plant protection“.

ISSN 2815-522X

In our September issue you can also learn more about pheromone traps against the tomato leafminer and pests in essential oil and medicinal crops.

You will also find the monthly calendar for plant protection measures in vegetables, prepared with great care and attention to the farmer by the specialists from the Maritsa Vegetable Crops Research Institute in Plovdiv.

The topic of the insert on biostimulants, which is published together with the print body of the journal, is: Biostimulants – a means to increase the productivity and quality of crop production.

In August there were also many corporate events, which we have covered in our September issue.

Enjoy your reading!
